WORK EXPERIENCE

Search Engine Optimization (SEO) Manager May 2021 – July 2025
WPP Media Remote, United States

- Spearheaded enterprise AI product adoption across GroupM agencies by designing scalable machine learning workflows and training 15+ team members to optimize operational efficiency.
- Architected custom data analytics and AI-driven reporting dashboards from scratch for global Unilever brands to streamline cross-functional decision-making and executive visibility.
- Engineered Python and JavaScript automation scripts to execute large-scale technical infrastructure audits, accelerating issue resolution and system performance.

Senior SEO Specialist (AI & Digital Strategy Consultant) January 2020 – May 2021
Independent Consultant New York City, New York

- Directed technical product and AI strategy engagements for enterprise stakeholders, aligning digital solutions with core business growth objectives.
- Improved web performance and scalability for 10 client properties, increasing acquisition and conversion rates.
- Facilitated cross-functional alignment between engineering teams and executive leadership to execute complex digital transformation roadmaps.

Senior SEO Analyst & Data Scientist October 2018 – January 2020
Ciencuadras Bogota, Colombia

- Deployed a production deep learning model trained on millions of images to automate real estate classification, reducing manual cataloging overhead and operational costs.
- Managed large-scale technical product migration of over 600,000 URLs from legacy PHP to modern Angular architecture, protecting search equity and user experience.
- Built robust data pipelines from server logs to extract user behavior insights, informing product roadmap development and feature prioritization.

Web Developer and Digital Marketing Consultant March 2015 – May 2018
Self-Employed Bucaramanga, Colombia

- Directed end-to-end product lifecycles for over 50 web applications and digital platforms, managing client requirements, scoping, and delivery.
- Engineered responsive web applications using HTML, CSS, and JavaScript to drive B2B and B2C revenue.

SKILLS

- Technical: Python, Machine Learning, Deep Learning, Natural Language Processing (NLP), SQL, JavaScript, HTML5, CSS3, Docker, Git, Tableau, Power BI, Google Analytics, WordPress
- Language: Spanish (Native), English (Professional Working)
